Southview Design

BACKGROUND

Southview Design is a landscape design-build contractor. Founded in 1978, we have completed over 7,000 landscaping projects throughout the Twin Cities region and western Wisconsin. We're known for one-of-a-kind projects characterized by intricate and challenging hardscape installations, massive retaining walls, steep slopes, architectural design elements, and environmental considerations, such as controlling runoff into lakes and streams.

OUR PROCESS

Our design-build process ensures a positive experience from start to finish. Designers and landscape architects help clients translate their wish list into a detailed plan, timeline, and line-item budget for construction. Projects are built to the highest standards by hardworking crews, led by expert project managers. At Southview, thoughtful design meets construction excellence to create amazing results that are backed by an industry-leading warranty.

MEMORABLE PROJECT

There's something unique about every homeowner and every design. We recently worked with a client who needed to make their outdoor space wheelchair accessible. Our solution included an ADA-compliant sidewalk, a fire feature with a tapered base, and a gently sloping path through the yard.

HONORS & AWARDS

Since 2008, we have received 38 awards for excellence in design and construction from local and national industry associations. In 2018 alone, we were honored to receive five awards, including a Silver Award of Excellence from National Association of Landscape Professionals, three awards of excellence from Minnesota Nursery and Landscape Association, and Contractor of the Year Award for outdoor living from the National Association of the Remodeling Industry - Minnesota.
